SUMMARY

- **Position** Industrial Business Development.
- **Localisation** Ile-de-France (France) & International.
- **Contract** V.I.E/V.I.A.

EXPERIENCE

Seyssins, France
Aug 2025 - Feb 2026

Process Business Engineer
STEAP STAILOR

Client-Supplier Relationship | AutoCAD | Cost Estimation | Project Management

- Lead industrial projects (food & beverage, biotechnology) ensuring cost / quality / schedule targets are met.
- Structure and drive project governance: scope definition, planning, progress tracking, issue management, meeting minutes, and action follow-up.
- Coordinate interfaces across internal departments (process, electrical, automation) to secure deliverables and decisions.
- Act as the main interface between clients and internal teams: clarify requirements, monitor commitments, and ensure regular communication.
- Ensure customer satisfaction by meeting milestones, delivering high-quality outputs, and proactively managing deviations.
- Design and consolidate process solutions: review specifications, define scope, requirements, technical interfaces, and layout/footprint constraints.
- Produce and maintain process documentation (including P&IDs in AutoCAD) and ensure overall technical consistency.
- Own the commercial/economic dimension: strengthen cost estimates (assumptions, options, risks), assess impacts, and contribute to project profitability.
- Lead supplier sourcing and tendering: draft RFQs, perform technical/commercial bid comparisons, run clarifications, and negotiate (price, lead time, scope, warranties).
- Secure contracting in coordination with internal stakeholders (purchase orders, technical/quality requirements, traceability).

Managed two key projects with budgets above €500k each.

Neuilly-Sur-Seine, France
Feb 2025 - Apr 2025

Process Engineer Consultant
Vulcain Engineering Group

Business Development | Talent Acquisition | Communication

- Conduct market research and competitive analysis to identify new business opportunities and target accounts.
- Design and execute outreach campaigns to generate new leads and develop commercial opportunities.
- Build and maintain strong relationships with recruitment managers to understand hiring needs and role requirements.
- Run end-to-end recruitment processes for multiple positions (sourcing, screening, interviews coordination, follow-up).
- Engage with candidates to assess technical skills, cultural fit, and overall alignment with project needs.

Certifications: Cosmetics GLP, PrimaVera, MS Project, Power BI, Operational Project Management, AutoCAD.

Saint-Pierre-Lès-Némours, France
Sep 2023 - Sep 2024

Apprentice R&D Product & Process Engineer
LUXIUM Solutions

Polymers | Scintillation | Gamma Rays | Business Development |Crystallization | CAPEX | Project Management

- Conduct research and optimize new products through testing and experimental trials.
- Collaborate with Sales, Quality, and Production teams to improve manufacturing processes and reduce costs.
- Manage timelines, budgets, quotations, and strategic plans while maintaining strong stakeholder relationships.
- Oversee process start-up and commissioning to ensure operational readiness and performance.
- Deliver training and provide hands-on support to production staff to enable efficient, safe operations.
- Identify business opportunities and negotiate supplier contracts (pricing, lead times, scope, and service levels).

Saint-Pierre-Lès-Némours, France
Oct 2022 - Sep 2023

Apprentice Product Development Engineer
SAINT-GOBAIN Crystaux et Détecteurs

Polymerization | Stadium Artefact | Bonded Assemblies | Scintillation

- Own end-to-end product development, ensuring high standards through rigorous testing, validation, and qualification.
- Create detailed CAD specifications to enhance product performance based on customer feedback and field returns.
- Collaborate cross-functionally (R&D, Quality, Production) and manage technical interfaces with suppliers.
- Troubleshoot production issues, optimize bonded assembly processes, and ensure regulatory/compliance requirements are met.

Lannemezan, France
Oct 2019 - Sep 2022

Apprentice Process Engineer
ARKEMA France

Polymers | Heat Transfer | Process Design & Simulation (PFD/P&ID, Aspen, Excel/VBA, PI ProcessBook) | Project Management

- Optimize water / steam / electricity consumption through performance analysis and continuous improvement action plans.
- Diagnose heat-transfer performance (networks, exchangers, utilities) and propose levers to reduce energy use and operating costs.
- Drive energy performance management (ISO 50001): draft the Energy Performance Plan (EPP) (TURPE file DREAL/Prefecture), define the metering plan, and build a 5-year action plan.
- Define and structure energy KPIs (EFPI + process/utilities indicators) and formalize calculation methods for performance tracking.
- Develop and execute industrial trials (specifications, risk assessment, acceptance criteria), analyze results, and issue recommendations.
- Implement daily performance monitoring (PI ProcessBook, Excel/VBA), troubleshoot process deviations, and contribute to reducing steam-trap losses.

Lièpvre, France
Jan 2019 - Feb 2019

Production Intern
PAUL HARTMANN S.A

[Period 1 : Jun 2018 - Jul 2018]
Lean Tools (5S, Kaizen, RCA, SMED, DMAIC, Six Sigma, VSM) | SAP | QHSE

- Apply Lean to reduce downtime and improve efficiency on 2 product lines.
- Deliver SMED with a visual changeover standard; achieve 78.8% reduction in changeover losses (time/cost).
- Deploy 5S + visual management across all zones to improve organization and reduce search time.
- Ensure traceability & quality control (documentation, deviations) and strengthen QHSE compliance (zone maps/safety cards).
- Monitor daily performance and drive problem-solving to sustain improvements.

EDUCATION

Toulouse, France
2023 - 2024

Master in Process & Bioprocess Engineering
Toulouse 3 University Paul Sabatier

Biotechnologies Major.
With Honors.

Toulouse, France
2019 - 2024

Engineering Degree in Process Engineering
INP-ENSIACET

With Honors.

Mulhouse, France
2017 - 2019

Associates Degree in Process Engineering
LPO LAVOISIER

Valedictorian.

Libreville, Gabon
2016 - 2017

Scientific High School Diploma
Lycée Privé Fondation MBELE

With Honors.

LANGUAGES

French - C2
Native

English - C1
Advanced. TOEIC : 940/990

Spanish - B1
Intermediate

Chinese - A1
Elementary

SKILLS

PI System & ProcessBook
MS Office 365
Lean Tools
ProSim
Devis (Optima SYDEV)
Polymeres
AutoCAD
MATLAB

PROJECTS

European Network Lead | 2025 - Present - *Gabonese Diaspora Women's Network (RFGD)*

Deputy Regional Delegate | 2024 - Present - *Greater Paris Area, Council of the Gabonese of France*

Student Mentor | 2020 - Present - *Greater Paris Region, Capital Filles*

CERTIFICATES & COURSES

Class B | Driving License
FMEA Specialist Certification | AIGPE
Process Mapping Specialist Certification | AIGPE
Lean Six Sigma Green Belt Certification | SSAA
