CLÉMENT ASSIER

Mechanical engineering graduate

(September 2026)

+33 7 82 22 76 13

18 Impasse des Tilleuls, 69100
Villeurbanne, FRANCE

clement.assier@insa-lyon.fr
clement.assier@gmail.com

SKILLS

Proficient in CAD software:
Solidworks, Catia
Programming languages:
Python, MATLAB
Microsoft Office Suite

Static and dynamic mechanics
Materials sciences
Design of structures
Fluid mechanics
Heat transfers

LANGUAGES

French : Native speaker
English : Fluent
Spanish : Conversational
German : Elementary

LEISURE INTERESTS

Competition level : Rowing (four selections in the national French team)
Outdoor sport (tennis, skiing, cycling)
Gardening

EDUCATION

2023 • 2026 - MEng degree in Mechanical engineering: Advanced Polymer Processing apprenticeship programme
INSA Lyon — France

2020 • 2023 - Bachelor's degree in Mechanical Engineering and Production Automation
High-level sports section
University of Lyon — France

2017 • 2020 - High school leaving diploma majoring in Maths & Sciences
Lycée Marlioz, Aix-les-Bains - France

PROFESSIONAL EXPERIENCE

April 2026 • August 2026 - GTW ALPEN — Germany
Mechanical engineering intern

- Performed experimental tests on a hydrodynamic loose oil ring bearing.
- Collected and interpreted measurement data on test bench performance.
- Contributed to improving test procedures and lubrication analysis.

2023 • 2026 - EDF, HYDRAULIC ENGINEERING CENTER CHAMBERY — France
Mechanical engineering apprentice

- Developed a calculation tool to estimate mechanical forces on foundations of hydroelectric plants.
- Designed and sized internal cooling systems for hydrodynamic bearings.
- Modernized the cooling system of thrust bearings for vertical hydraulic units.
- Prepared specifications for the supply of large mechanical components (runners, thrust bearings).
- Collaborated on the innovation and development of a PEEK mechanical thrust bearing with a German company and INSA laboratory.
- Performed finite element analysis of shaft line dynamics on a Pelton turbine.

2023 - RADIALL, LYON - FRANCE
January/ March — Bachelor internship
June/ August - Design office technician

- Designed and developed production tools to increase production.
- Carried out laboratory tests on optical cables.
